The emerging theories of cognitive humanism include constructivism, social learning theories, cooperative learning approaches (not truly a theory), and transformational learning theory. These new and emerging theories are explained below. Figure 1 (attachedto your "pre-class" instructions) shows a matrix of contemporary cognitive-humanistic theories that are setting the scene for the current shifts in thinking about teaching and learning.

The Influence of New and Emerging Theories on Teaching ...

All of the above emerging theories share many of the same aspects. One strong aspect is they all suggest that learning occurs best in a community of learning or practice. The word community implies that the people within it are taking an active part in the process of learning. They all support communication amongst the learners and interaction ...

Emerging Theories of Learning and the Role of Technology ...

This article attempts to elate aspects of our commonsense understanding of motivation to an emerging, mechanistic account of motivation in neuroscience. It identifies various points in the neural process where motivational control will have an opportunity to play a role. It suggests that these points of influence occur in the early stages of planning a course of action by sequencing a set of ...

Emerging Theory of Motivation - Oxford Handbooks

These theories play a large role in education and research in contemporary Finance, Microeconomics, Accounting, and Management/Organizational Behavior. Agency theory focuses on the dilemma of firm owners (principals) who must hire agents (managers) to run their firms (Jensen and Meckling, 1976; Fama, 1980). The firm is a nexus of contracts ...

Contemporary theories of learning. There are two main schools of learning. Behaviourism has largely been superseded so will only be discussed briefly. Most current educational practice is based upon the cognitive approach, which will form the main part of this section.

Contemporary theories of learning - Information Literacy ...

Emergent learning builds the organizational learning "habit" from the bottom up, by focusing a team on mastering performance in an arena that is important to them. The venue may be big and "strategic," such as demonstrating leadership during a merger, or it may be small and "tactical," such as planning food for faculty meetings.
