Are Telekinetic Powers the Next Step in Human Evolution? sci-fi entertainment scientific theories. The human mind is an amazing thing: 100 billion neurons make it possible for us to walk, talk, think, create, build — the list is virtually endless. Human nature, meanwhile, inspires us to want more, to push the boundaries of brainpower and ...

Are Telekinetic Powers the Next Step in Human Evolution ...

I think that for humanity, the next logical step is further integration with machines, on an intimate level. This will probably blur the lines between humans and machines. In addition I think we’re going to get to a point where we’re nearly post-scarcity, for both money and resources, though this might come later.

What do you think will be the next giant leap for mankind ...

The Anomaly, the next step in human evolution - humanity 2 ...

Both in the original comics and in the new film, Victor Stone’s mind and body have been advanced against his will to create a better version of a human. By the comic book classic formula, Victor has to learn to control these new powers and overcome the feeling of being a threat to humanity. Neil Harbisson is a cyborg too, only in real life ...

Reality Check: Are Cyborgs the Next Step in Human ...

Primary among them is the notion that being on the autism spectrum is the next step in human evolution. Evolution, it seems, is the name of the game, making the predators bigger, better, and badder. This, of course, isn’t the first time people have suggested that particular psychological or neurological differences might be advantageous.
